

Installation of AimsunExporter/SimAdapter Version 1.2.2

To ensure the correct installation and use of the AimsunExporter/SimAdapter Version 1.2.2 please follow the explained procedure of installation and setting correct paths in Aimsun and Office:

1. Removing of current installation of AimsunExporter/SimAdapter:

The current installer doesn't override the current installation of the AimsunExporter/SimAdapter. To remove problems with two installations in parallel, please remove the current installation via Windows → Apps and Features:

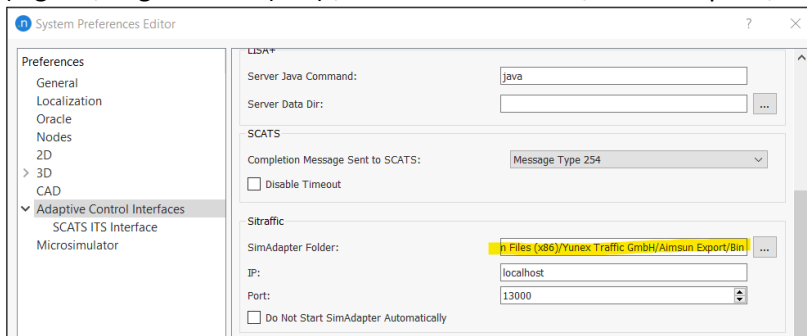

2. Installation of new AimsunExporter/SimAdapter Version 1.2.2:

Install the new AimsunExporter/SimAdapter with the installer. You can use the default path: C:\Program Files (x86)\Yunex Traffic GmbH\Aimsun Export\
Or choose an own path.

3. Setting correct path in Aimsun:

It might be possible, that the paths from the old version and the new version are different. In that case it's necessary to set the path of the new installation in Aimsun:

Main-Page → Edit → Preferences → Adaptive Control Interface → SimAdapter Folder, and set the path where the **Sittraffic.Shared.Aimsun.SimAdapter.TASimAdapter.exe** is located: (e.g. C:\Program Files (x86)\Yunex Traffic GmbH\Aimsun Export\Bin\)

4. Setting correct path in Office:

For the Aimsun Exporter it's also necessary to ensure the correct path in Office under:
